

30 years

much-net AG is a medium-sized software company headquartered in Bonn (Germany) and specialised on the development of software for credit institutions, insurance companies, capital investment companies and corporations.

We have developed the **PMS (Portfolio and Risk Management System)** standard software package and we are selling it successfully in West and East European countries.

We are looking for a

Programmer (m/f)

with a minimum of **2-3 years work experience** to support us in the implementation of new developments and in the maintenance of our finance software.

Your Qualifications

- Degree in information technology or completion of an equivalent training
- You have developed software using C++ and Java technology during and after your studies/training
- Oriented to high quality software and appealing solutions
- Expert knowledge of C++ and eagerness to meet new challenges
- Knowledge of several of the following technologies and expressions in the context of C++:
 - ANSI standard, different STL implementations, storage allocators, multithread processing (Windows<->Unix), portability, CORBA, GUI programming (wxWidgets)
- Readiness to meet the challenge of code optimisation in large-scale projects
- Knowledge of the following technologies and expressions in the context of Java:
 - Swing, CORBA, Design Patterns, SQL
- Knowledge of the Oracle database system
- Familiar with SybaseSQL and MS-SQL systems
- Good knowledge of the Windows operating system, MS Visual Studio development environment and CVS

- Knowledge of different Unix derivatives (Linux, Solaris, AIX, etc.) would be advantageous
- Familiar with gcc and gdb
- Not only technical qualifications, but also analytical skills and creativity
- You like working in a team
- Good command of written and spoken English

Duties and Responsibilities

- Technical implementation of new PMS functions in accordance with the requirements of PMS customers and our development department
- Redesign of approved PMS functions
- Develop concepts, implement reports and create customer-specific reports from the PMS database
- Further development of the graphical user interfaces
- Provide technical customer support
- In charge of technical support and further development of company website
- Conceive, design and implement interfaces with other systems
- Offer technical advice to the mathematical development department
- Problem-oriented approach to work and constructive contributions to the team in terms of skills and knowledge

We offer

- a pleasant working environment in a dynamic growing company
- high degree of creative freedom
- a young, open-minded and highly motivated team
- a salary commensurate with your performance
- further personal and professional education possibilities

If these diverse and interesting tasks appeal to you, we are looking forward to receiving your application (**by email only**):
